

ENVIRONMENTAL POLICY

The management of Aulfon Construction Limited is committed to improving our environmental performance and promote environmentally sustainable products, services and solutions to our employees, clients and consumers. We recognize that our role as a responsible corporate citizen is to mitigate and prevent pollution and protect the environment and community from impacts which may arise from our activities. Aulfon requires all employees, suppliers and contractors to be aware of their responsibilities and to conduct operations in a manner which actively supports implementation of this policy. Our approach to achieving this policy commitment in conformity to ISO14001:2015 and comply with all relevant compliance, legal, regulatory, and statutory requirements, are as follows:

Sustainable Procurement

- We will progressively identify opportunities in our supply chain to promote certified sustainable products, services and alternative solutions with our clients, suppliers and customers.

Energy & Climate Action

- We will progressively identify opportunities to reduce our operational energy consumption and direct emissions, seek alternatives and promote innovative solutions with our clients.

Water Quality & Conservation

- We will endeavour to reduce portable water consumption in our operations.

Resource Recovery & Waste Avoidance

- We will manage reductions in waste-to-landfill, and recycling of waste.

Natural Environment

- We will prevent pollution of the natural environment by promoting awareness, and take measure to prevent degradation to the ecosystems.

A committee includes representatives from senior management, members of Health, Safety & Environmental Department, will ensure this Policy and Strategy is resourced and regularly reviewed appropriately to remain effective in its delivery.
